Boss airbag load assist kits

Boss airbag and 6mm thick brackets has enabled vehicles to carry the load they were intended to. Boss Load assist kits are easy to fit and most simply bolt on using basic hand tools. Strong brackets and only the best quality airbags are used in these kits.

Benefits

Enable vehicles to cope with uneven or heavy loads - maximising the safe load carrying capacity
Keeps vehicle level Improves steering and balance
Helps maintain control of loaded vehicle by maintaining stability Improves ride quality Reduces tyre wear
Keeps headlights aimed on the road not into the trees
Kit comes with neccessary hardware, hoses & valves for manual operation. While it is not needed, consider adding a compressor or on board air kit so you can inflate your airbags anywhere anytime.
